PREFACE v

POSTCRIPT TO PREFACE . . . ix

L THE BACKGROUND OF HISTORY AND PRINCIPLES i

Animism—The Psyche of Plato and Aristotle—
Descartes, the Father of the Mechanical Biology
—"Vitalism variously defined—The culmination of
the Mechanical Biology with the Mechanization of
Psychology—Its Breakdown with the Apostasy of
T. H. Huxley—The Revulsion against Mechanism—
Description and Explanation in Biology—The
Necessity of Causal Explanation—Two Kinds of
Causation, the Mechanistic and the Teleological—
Some Branches of Biology far advanced in Description
but lacking causal understanding—Genetics a notable
Example—Its great Influence in prolonging the Life
of the Mechanical Biology—All Inductive Generaliz-
ation hazardous—The Absurdity of maintaining the
Mechanistic Biology out of deference to Physical
Science.

II. THE MECHANICAL BIOLOGY OF TO-DAY . . 58

Varieties of Biological Materialism represented by
Hogben, Needham, E. B. Wilson—Hogben's reliance
on American ' Behaviorism' and the ' Conditioned
Reflex *—His uncompromising repudiation of all but
the crudest Materialism—Needham's recognition of
organization and the insufficiency of the additive
method—His Materialism is heuristic only and founded
on delusion that all causation is mechanical—Wilson's
Materialism represents merely the faith and loyalty of
the Old Guard and. the ingenuous belief that only the

spatially extended is knowable.
